81245 München (DE)

(54) **Recording apparatus and method**

(57) A recording apparatus for forming a color image on the recording material, includes a recording head having a plurality of recording elements; recording head driving means for driving the recording elements of the recording head in accordance with image data to form an image on the recording material; a plurality of sup-

plementing means for effecting supplementations, in different manners, for supplementing defects in a recorded image resulting from a non-operating recording element of the recording elements; and control means for selectively operating the plurality of supplementing means depending on a record image to effect the supplementation.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 01 11 0690

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
